iW4-ARC

Basic Product Information

Thank you for buying the awesome NHT *iW4-ARC* in-wall loudspeaker. The *iW4-ARC* is a modern, 3rd generation super-premium in-wall speaker that utilizes NHT's new Anti Resonant Casting (*ARC*) frame technology. *ARC* adds unprecedented strength and durability to the frame while reducing vibration-based distortions to inaudible levels. But wait, it gets better. When the *ARC* frame technology is combined with NHT's premium dual-woofer, 3-way, all-aluminum driver array and NHT's loudspeaker voicing expertise, the results will rival the very best speakers available, in or out of a wall.

What you will find in this box:

(1) An *iW4-ARC* in-ceiling speaker.

(1) Metal Grille Cover

(1) Cardboard Template

.....

Installation: Cutting holes in ceilings and walls and installing heavy objects above you and your loved ones is serious business. There are also numerous decisions concerning wiring, control systems, methods, and best practices only a professional will have knowledge of. Please consult a professional to install this speaker. Find an Installer near you by visiting www.nhthifi.com - Where to Buy or visit www.cedia.org to find a CEDIA installation professional.

That said, we know there are capable do-it-yourselfers. If you're one and want to do this on your own or with the help of an expert friend, visit the NHT Website www.nhthifi.com and download the Installation Guide. Measure twice and cut once!

Paint Warning: NHT recommends that you use a capable, professional painter only to paint this speaker (as necessary to match the wall or ceiling). Latex paint will definitely clog the micro-perforated grill holes and constrict the speaker's performance capability. Contact us if you need a new grill cover.
