

## RACING MEMO

**ISSUED:** October 04, 2018

**NUMBER:** RM 18-08

**FROM:** Board of Directors

**TO:** All Participants

**SUBJECT:** Spec Miata Axles

Given recent events, the SCCA CRB makes the following change to the GCR effective immediately for the remainder of the 2018 Spec Miata season. The CRB acknowledges that Spec Miata OEM, re-manufactured or rebuilt axles do not have a published specification nor are the axles a serviceable item. As a follow-up the CRB has asked the SMAC to provide a recommendation for 2019 for Spec Miata axles.

Add to section 9.1.7.C.2

*"i. The half-shaft CV Joints shall be an OEM or OEM equivalent part. The internal cage and bearing dimensions are unrestricted. This rule is effective until 12/31/18."*
